

Sanu K Khan

Tech Lead • Cloud & MS Architect • Enterprise Integrations Specialist • Blockchain • Cyber Security
Dubai UAE +971 563860850(UAE), +91 9746110065 (IN)(WA) sanulgbello@gmail.com

PROFESSIONAL SUMMARY

Highly accomplished Technology Leader, Solution Architect, and Principal Engineer with 13+ years of experience architecting scalable enterprise systems, cloud-native applications, distributed platforms, and operational intelligence solutions across retail, automotive, airline, SaaS, and digital commerce domains. Recognised for strong analytical thinking, rapid problem-solving, deep system architecture expertise, and the ability to transform complex business challenges into scalable technology solutions.

Specialised in cloud architecture, event-driven systems, enterprise integrations, microservices, and high-scale platform engineering using Azure, AWS, Kubernetes, Node.js, React, Python, and modern DevOps ecosystems. Known for continuously learning emerging technologies, researching innovative AI-driven operational intelligence systems, and building future-focused digital products.

Passionate about helping SMEs and enterprises modernise their digital presence, automate operations, improve business intelligence, and accelerate digital transformation initiatives. Strong interest in AI orchestration, operational intelligence, predictive systems, business intelligence, and research-driven engineering innovation.

Active technical writer and technology enthusiast with expertise in advanced programming, enterprise-grade solution design, system optimisation, API integrations, cloud automation, analytics, and scalable SaaS architecture.

PROFESSIONAL HIGHLIGHTS

- 13+ years of experience delivering enterprise software solutions and cloud-native architectures
- Strong expertise in problem-solving, solution engineering, analytics, and scalable system design
- Advanced programming capabilities across JavaScript, TypeScript, Python, Java, PHP, and enterprise frameworks
- Architected and optimised high-scale distributed systems handling large enterprise product catalogues and integrations
- Experienced in designing event-driven systems, microservices, serverless platforms, and multi-region deployments
- Strong research and development interest in Artificial Intelligence, Operational Intelligence, and Business Intelligence
- Continuous learner actively exploring emerging technologies, AI systems, automation platforms, and cloud innovations
- Technical writer focused on architecture, engineering solutions, enterprise integrations, and digital transformation
- Helping SMEs and enterprise businesses improve digital visibility, automation, scalability, and operational efficiency
- Experienced in mentoring engineering teams, driving technical governance, and leading architecture initiatives

CORE COMPETENCIES

Solution Architecture • Cloud Architecture (Azure, AWS, GCP) • Microservices & Distributed Systems • Enterprise Integrations • Event-Driven Architecture • AI & Automation Solutions • Operational Intelligence • Business Intelligence • Scalable SaaS Platforms • API Engineering & Integration • DevOps & CI/CD • Docker & Kubernetes • System Optimization & Analytics • Technical Leadership & Mentorship • Digital Transformation

EDUCATION

KERALA UNIVERSITY, THIRUVANANTHAPURAM, KERALA

Bachelor of Technology Computer Science and Engineering, September 2015

KERALA STATE HIGHER SECONDARY BOARD Thiruvananthapuram, Kerala

12th Higher Secondary Education August 2011

PROFESSIONAL EXPERIENCE

TECHCARROT LLC. Dubai Production City, Dubai-UAE

Tech-lead (Al-Futtaim EIT Client)/, February 2022 – Present

Project:

- **Mark & Spencer, B&Q, ACE and Watsons Brands** – Led **Multi-system integrations** using **serverless functions (Azure Functions / Serverless Framework)** for seamless product data synchronisation across multiple channels.
- **Blue Rewards App** – Engineered complex B2B modules (MERN stack) that improved partner onboarding **speed by 25%** and increased validation **accuracy by 15%** for Blue Rewards App
- **Retail Channel Automation** – Developed **event-driven architectures** for **price and inventory updates** leveraging **Azure Event Hubs, Kafka, RabbitMQ, Node.js, and Cosmos DB** for real-time retail synchronisation.
- **Order Management Systems** – Designed and implemented **post-sales order routing** and **fulfilment application integrations**, optimising order flow and reducing processing delays.
- **Enterprise Integrations** – Delivered **SAP–PIM, PIM–Shopify, and PIM–KIBO** integrations using **Node.js microservices**, enabling unified catalogue and order management across e-commerce platforms.
- **Automotive Domain** – Built a **Used Car Centralisation Platform** providing an **omnichannel experience** through **MEAN stack architecture**.
- **Cloud Infrastructure** – Architected and deployed scalable solutions using **Azure Cloud, Kubernetes, and Docker**, ensuring high availability and cost efficiency.
- **HRA Management System** – Delivered a **multi-tenant SaaS-based HR management platform** using **MERN microservices**, enabling configurable and tenant-isolated deployments for enterprise clients.
- **Intranet Portal (SPFx)** – Developed a **SharePoint Framework (SPFx)-based Intranet solution** to streamline internal operations and document workflows.
- **Data Analytics & Mentorship** – Supported **data analytics initiatives** using **Python**, while mentoring a **team of three developers** in automation and analytical solution development.

28 LIGHT BULBS. Dubai Silicon Oasis, Dubai-UAE

Front-end Developer, October 2021 – January 2022 (contract)

Project:

- SaaS based ERP - tailored for interior design consultants & agencies
- Implemented gantt chart based workflow automation for project management.
- Implemented the service workflow for budget calculation
- Operational Intelligence for Workforce Management

TP CONNECTS TECHNOLOGIES LLC. Deira, Dubai-UAE

Full-stack Developer, March 2021 – October 2021

Project:

- Airline ticketing B2B Marketplace (NodeJS - ReactJS, Java Micro Service)
- NDC airline content management. B2C (NodeJS, React & Java Spring Boot)
- B2B Airline Aggregator Solution (NodeJS - Angular, Java Micro Service)

CANDOUR AUTOMATION TECHNIK PVT LTD. Thiruvananthapuram, Kerala - INDIA

Research and Development Engineer, September 2016 – December 2020

Projects:

- Garage Management System. (Angular Java- Spring Hibernate)
- Video conferencing application for career guidance. (ReactJS Python-Django)
- Roadside Assistance Management. (Angular Spring Boot)
- Technical Assistance Request Form. (React, PHP CodeIgniter)
- E-commerce - for Garage spare parts and equipment. (PHP - Woocommerce)
- Request and Asset Management System. (Native Android - Java, ReactJS)
- Marble Imports and Exports Resource Planning Solution. (Core PHP MSSQL)
- Trading and Retail Management System. (Spring Boot)
- Several Corporate and personal websites for Candour Group & other Customers. (Static HTML and WordPress)
- Simple Accounting & Invoicing Application, released as a product (NodeJS)

SOFTONIC TECHNOLOGIES, Thiruvananthapuram, Kerala

Junior network engineer, Jan 2016 – September 2016

Projects:

- Network design and implementation.
- Routing protocols, security implementation, and testing.
- Windows Server management.
- User role definition and workstation setup

PRO WINS AGRI SYSTEM, Thiruvananthapuram, Kerala

Local systems administrator, September 2015 – December 2015

Projects:

- Network management.
- System management.
- Office coordination.
- Data entry.

ENTREPRENEURIAL & FREELANCE EXPERIENCE

Independent Software Consultant 2010 – Present

Projects:

Delivered 100+ software solutions across multiple industries.

Notable Projects:

- Real Estate ERP platform (Web + Mobile)
- AI Chatbot platforms
- Learning Management Systems
- Medical Laboratory SaaS systems
- Airline booking systems
- E-commerce platforms (Shopify / PWA)
- Food delivery platforms
- Process automation scripting with Python
- Micro APIs for vehicle OBC connector with SAAS APP

TECHNICAL SKILLS

Category	Technologies	Category	Technologies
Programming Languages	JavaScript (Node.js / TypeScript), Python, Java, PHP, Ruby On Rails	Cloud Platforms	Microsoft Azure, AWS, Google Cloud
Frontend Frameworks	React, Next.js, Angular	DevOps	Docker, Kubernetes, CI/CD, Azure DevOps, GitHub Actions
Backend Frameworks	NestJS, LoopBack, Spring Boot, Django, Laravel, CodeIgniter	Databases	MongoDB, CosmosDB, MySQL, PostgreSQL, MS SQL Server, DynamoDB
Architecture	Microservices, Serverless Architecture, Message Queues	Infrastructure	Load Balancers, DNS Services, Notification Services

SOCIAL PROFILE

Leading architecture and platform engineering initiatives for event-driven commerce systems, enterprise integrations, and multi-region cloud solutions. Passionate about enabling small and medium-sized businesses (SMEs) to accelerate digital transformation, optimise operations, and expand their digital presence. Creator of Zaakiy V3RSE, an intelligent operational and business automation ecosystem.
